
Family Support Navigators help people and their families better understand the progression of addiction, provide guidance on how to navigate insurance issues, and offer information on how to access treatment services. They can also help families adjust to a loved one's return home from treatment. In short, Family Support Navigators provide support for families throughout the recovery process and connect them to a variety of vital resources.

Odyssey House
Where recovery gets real

SNAPSHOT

Community-based support services for families

Utilizes evidence-based practices

PEER-BASED MENTORING MODEL

SELF-DIRECTED TREATMENT PLAN

Builds community connections

One-on-One CASE MANAGEMENT

Reduces RISK OF RELAPSE

The Odyssey House Family Support Navigator works one-on-one with you and your family, connecting you to community-based resources and recovery support services that sustain your short- and long-term goals.

The Family Support Navigator serves as a liaison, linking you to recovery coaches who will serve as peer mentors that facilitate your family's community connections.

Our primary objective is to assist families with identifying and accessing community-based support services to maintain their recovery.
